

Part I: Speech Quality

Please listen to the speech samples A, B, C in each group, and rate the overall quality of each audio sample using a 5-point scale:

1 = bad, 2 = poor, 3 = fair, 4 = good, 5 = excellent.

You may use up to two decimal places (e.g., 3.25) when assigning your scores.

Your rating should reflect the overall speech quality, considering aspects such as naturalness, intelligibility, and your overall impression of the audio.

Part II: Speaker Similarity

Please listen to the speech samples A and B in each group, and rate the **speaker similarity** of each sample compared to the **reference speech**, using a 5-point scale:

1 = completely different, 2 = mostly different, 3 = somewhat similar, 4 = mostly similar, 5 = exactly the same.

You may use up to two decimal places (e.g., 3.25) when assigning your scores.

Please focus only on whether the speaker in each sample sounds like the same person as in the reference.

Ignore differences in speech content, audio quality and expressiveness. We purely focus on speaker similarity in this part.

Part III: Instruction Following Rating

Please listen to the speech samples in each group and rate **how well each sample follows the given instruction** on a 5-point scale. You may use up to two decimal places (e.g., 3.25).

Rating scale (0–5):

0 = completely opposite to the instruction / does not follow at all

1 = almost not following

2 = mostly not following

3 = partially following

4 = mostly following

5 = perfectly follows the instruction

Focus only on whether the speaking style matches the instruction (e.g., emotion, speaking rate, pitch, energy, tone). **Ignore differences in speaker identity, speech content, or audio quality. We focus only on instruction following in this part.**

Instruction Following Rating

	Instruction	A	B	C	
Group1	尽管缺乏活力，她的音调依然很高且愤怒。 (Despite the lack of energy, her irate pitch is high.)				Ans
Group 2	slow, exhausted, low pitch, low-energy				Ans
Group 3	低能量、高音调、出人意料 (low energy, high pitch, surprising)				Ans
Group 4	Employing a deep voice and typical speaking speed, the depressed male speaker's communication style suggests lowered enthusiasm.				Ans

Instruction Following Rating

	Instruction	A	B	C	
Group5	不管气氛多么沉闷，她依然用高亢的声音传递着愉悦的情绪。 (Despite the subdued atmosphere, she still spoke in a bright, high-pitched voice that carried a cheerful mood.)				Ans
Group 6	这位愤怒的男士用低沉而缓慢的声音述说着，语气中充满了疲惫。 (The angry man spoke in a low, slow voice, his tone heavy with exhaustion.)				Ans
Group 7	With a subdued energy, her wrathful voice took on a sharp key as she spoke slowly.				Ans
Group 8	A depressed man's low-pitched voice contributes to a comfortable exchange, conveying ease with standard enthusiasm.				Ans
